## ROKK IF2000

Simple

Solid

Dependable

The ROKK ingredients feeder complements the range well. Its purpose is to feed ingredients into the flow of ice cream in a uniform manner, making use of its durable and hygienic design.

## Specifications

Ingredient dispensing (MAX)	200kgs/hour
Ingredient dispensing (MIN)	4kgs/hour
Ice cream flow (MAX)	2000 litres/hour
Ice cream flow (MIN)	40 litres/hour
Max inclusion size	15 mm
Electrical consumption	2.5kw
Drive motors	3
Dimensions	110cm x 68cm x 140cm
Hopper capacity	30 litres
Weight	270kg

## Benefits:

- Mechanical - high reliability
- Well engineered - durable
- Basic but functional - simple to operate
- Very easy to maintain

“If we were buying a machine all we would want is something to work day in and day out”

## Pump

With the IF2000 we have chosen to utilise the Lamella pumping system. From our years of experience, this is by far the best way of feeding ingredients into the flow of ice cream.

## Advantages

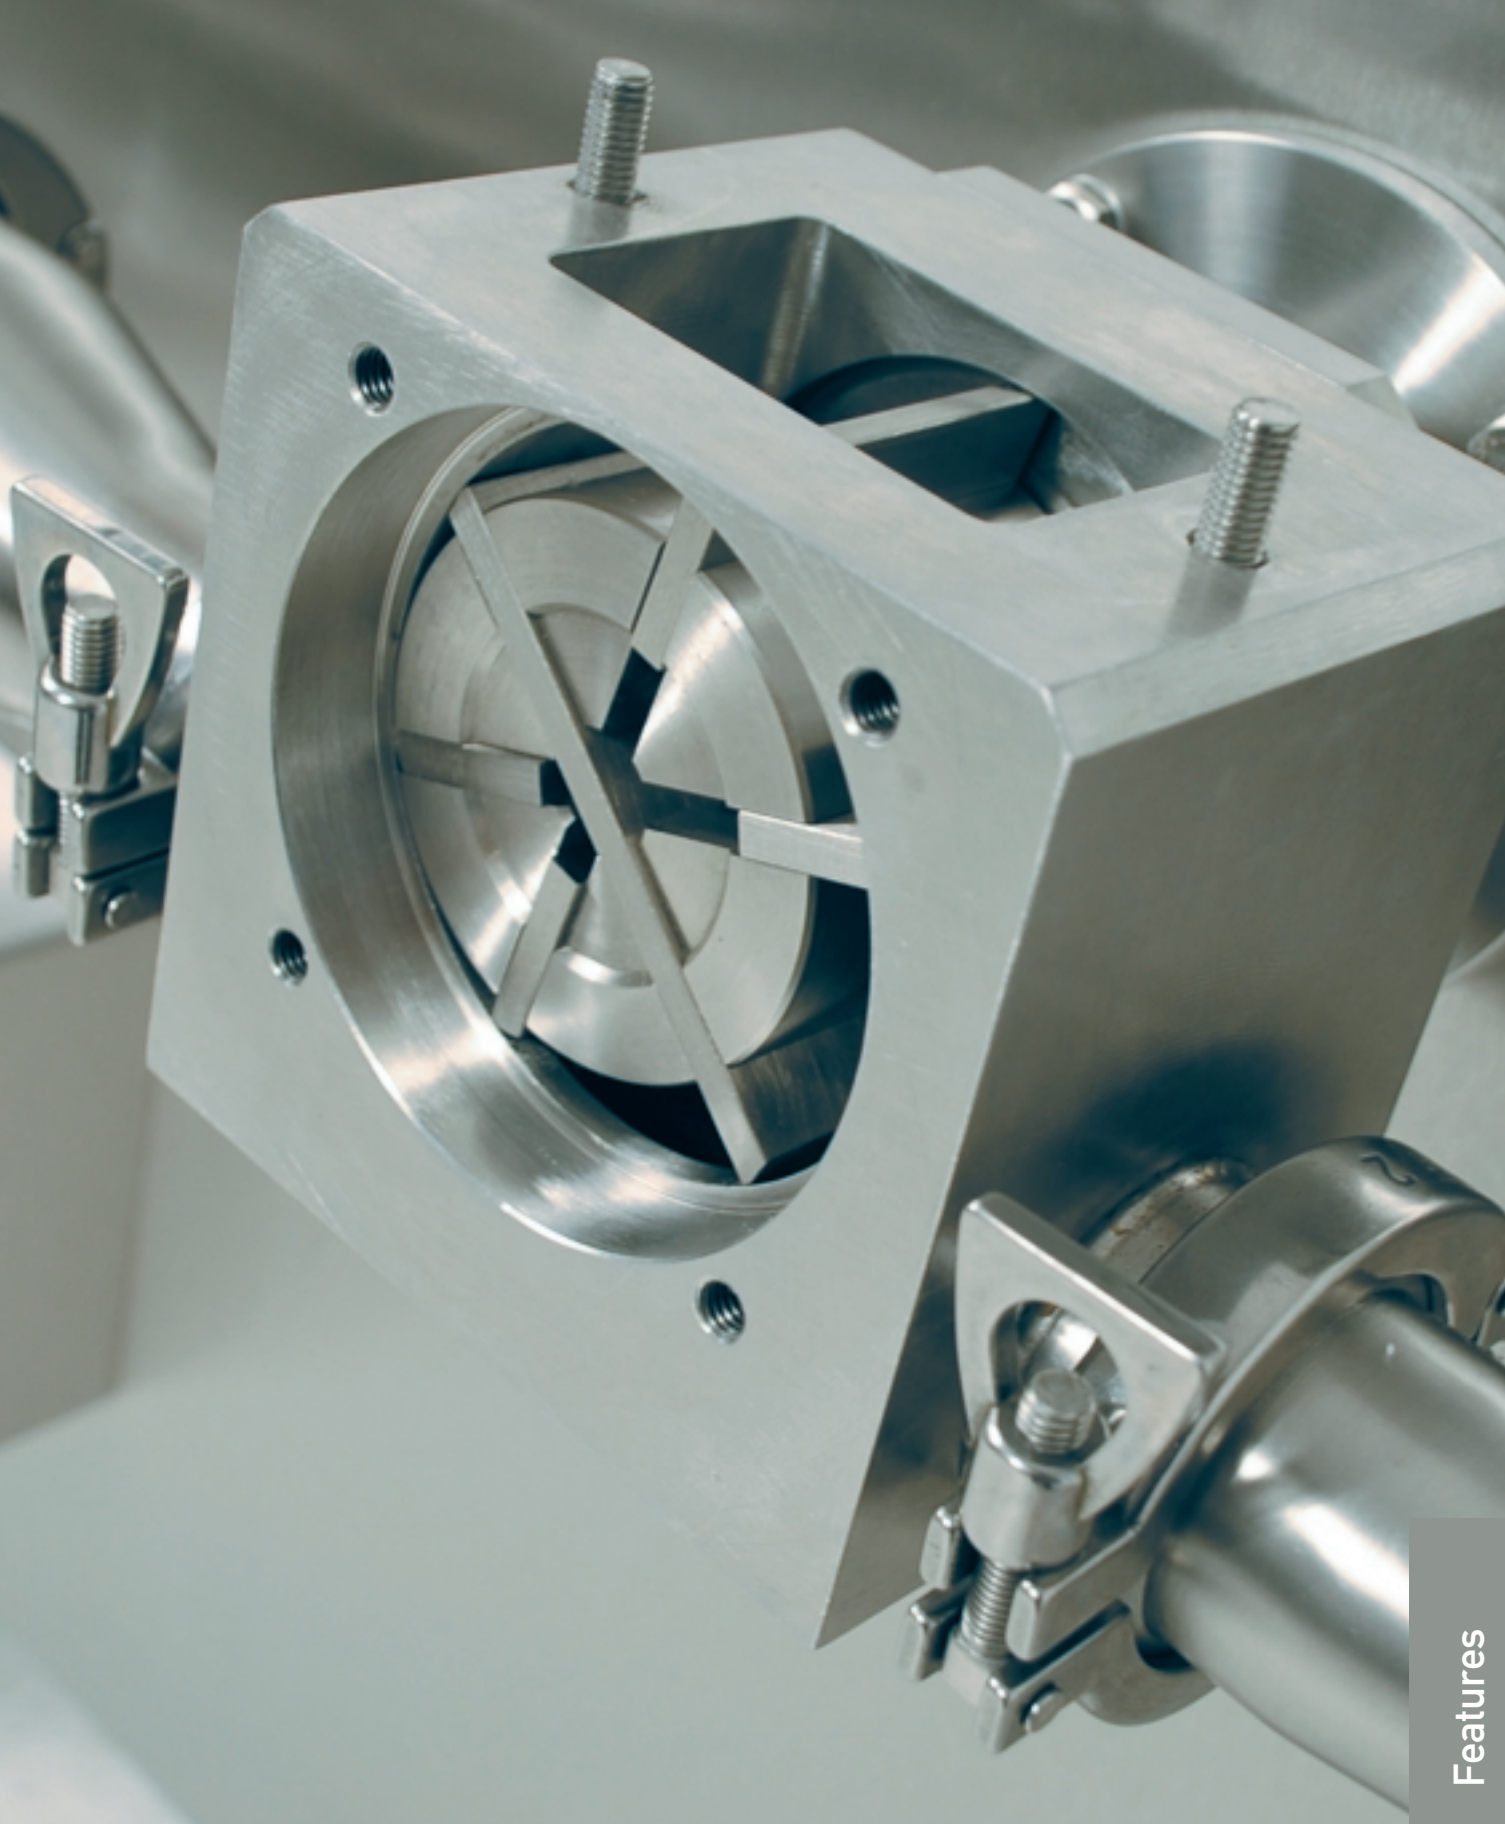

- The inlet of the pump is always open therefore avoiding bridging of sticky products such as toffee and chocolate
- Gives a constant and uniform feed of ingredients
- Prevents the destruction of the shape and form of the inclusion
- Doesn't create air pockets in the flow of ice cream so when working inline with a filling machine it gives increased fill accuracy and consistency

## Feed Augers

The machine is supplied with 2 feed augers that are machined to different pitches in order to suit various products. The smaller pitch for smaller products and visa versa.

## Blender

The machine can handle a wide variety of products such as chocolate, toffee, sweets, candy, fruit and jams.

The in-hopper agitator keeps the particulate in the jams in suspension.

## Adjustments

The machine is fully adjustable as there are 3 variable speed motors inside that independently control the auger, pump and blender.

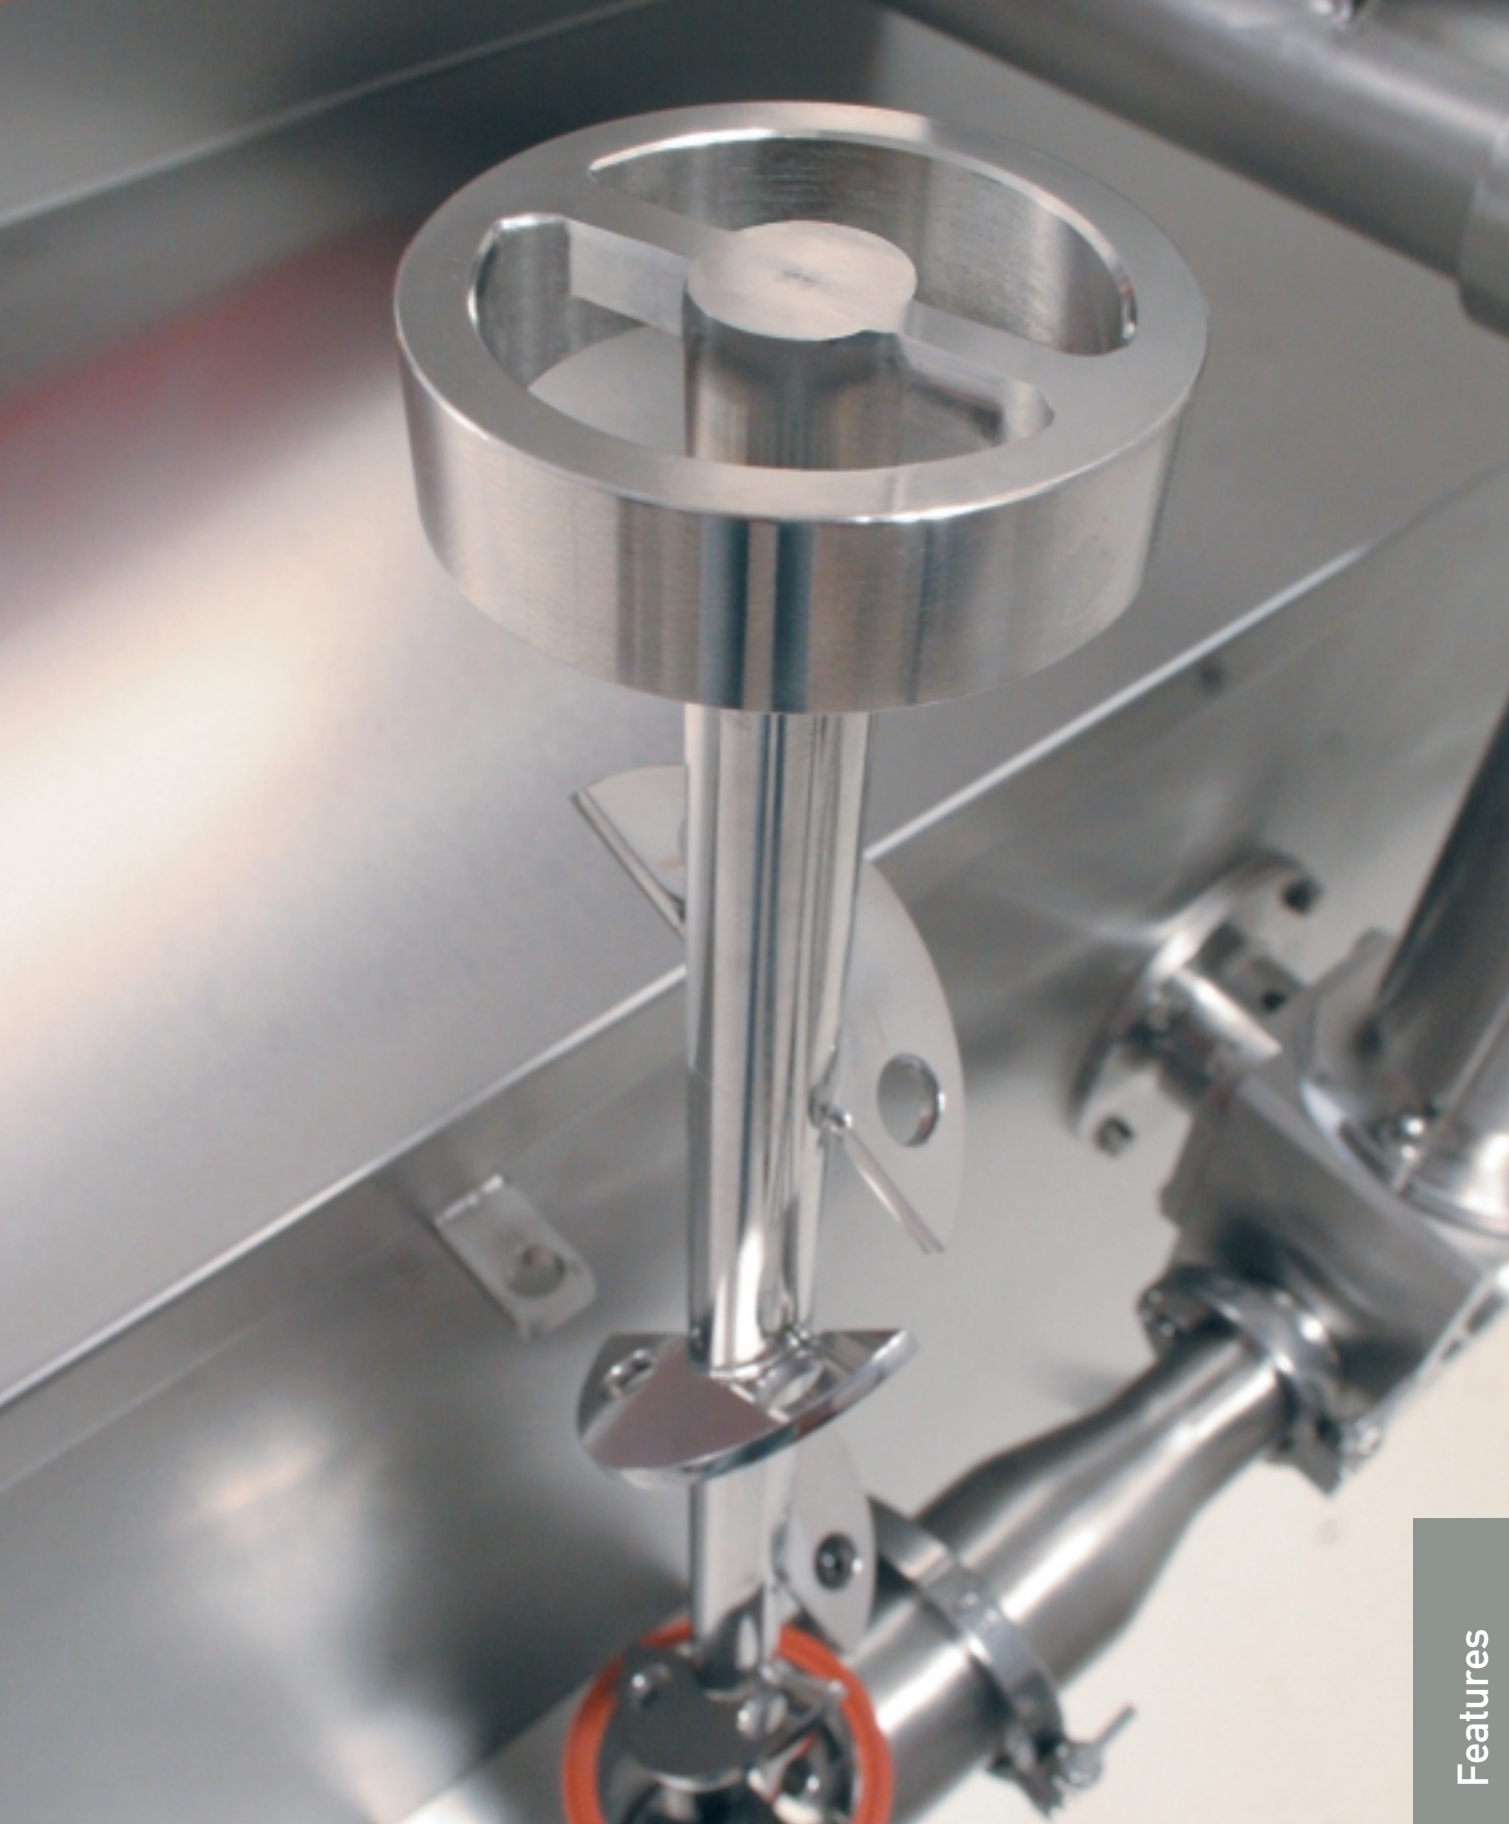

## Build

As with all the items in our range the machine is simple solid and dependable. The chassis is 100% stainless steel and the working parts are a unique blend of stainless and special alloys which allow different sectors to work together in lasting unison.

## Warranty

12 month parts only warranty.

## Ask about our full range of products They include:

- Rotary Fillers
- Inline Fillers
- Inclusion Feeders
- Ice Cream Freezers
- Ripple Pumps
- Batch Pasteurisers
- Batch and HTST Mix Plants
